

Your Behind-the-Scenes Security Operations Team

Deliver full cybersecurity without hiring, managing tools, or handling day-to-day security work.

THE PROBLEM

MSPs are expected to deliver cybersecurity, but:

-  Hiring SecOps talent is expensive and inconsistent
-  Tools create more work, not less
-  Alerts, tickets, and incidents drain time and margins

WHAT WE HANDLE

-  Onboarding, configuration, and ongoing management
-  24/7 monitoring and ticket response
-  Alert triage and escalation
-  Incident investigation and remediation

OUTCOME

-  Less operational burden
-  Faster response times
-  Stronger client confidence
-  More profitable cybersecurity offerings

THE SOLUTION

Safeguard handles all the work, behind the scenes.

We become your Tier 1 SecOps / SOC team, operating across your entire security stack.

WHAT MAKES THIS DIFFERENT

-  One team across your entire stack
-  30-minute first response SLA
-  No handoffs between prevention and response
-  Delivered at no additional cost when sourced through FutureSafe
