

## Your Behind-the-Scenes Security Operations Team

Deliver full cybersecurity without hiring, managing tools, or handling day-to-day security work.

### The Problem

MSPs are expected to deliver cybersecurity — but:

- Hiring SecOps talent is expensive and inconsistent
- Tools create more work, not less
- Alerts, tickets, and incidents drain time and margins

### The Solution

**Safeguard handles it — completely behind the scenes.**

We become your Tier 1 Converged SECOPS team, operating across your entire security stack.

### What We Handle

- Onboarding, configuration, and ongoing management
- 24x7 monitoring and ticket response
- Alert triage and escalation
- Incident investigation and remediation

### What Makes This Different

- One team across your entire stack
- 30-minute first response SLA
- No handoffs between prevention and response
- Delivered at no additional cost when sourced through FutureSafe

### Outcome

- **Less operational burden**
- **Faster response times**
- **Stronger client confidence**
- **More profitable cybersecurity offerings**
